SUMMARY

AI Product Manager focused on GenAI and B2B SaaS, with hands-on engineering depth. Independently designed, built, and shipped two production AI SaaS products end-to-end — from architecture and LLM integration to deployment, analytics, and go-to-market — while working in the recruitment domain with direct exposure to B2B lead-generation workflows. Combines product thinking with the technical fluency to prototype, ship, and iterate on AI features solo.

EDUCATION

B.Tech, Computer Science — [IPS Academy, Indore](#) | CGPA: 9.1/10 | 2025

SKILLS

Product & Strategy: Product Roadmapping, User Research, A/B Testing, Requirements Definition, Agile Sprint Planning, Go-to-Market Strategy

AI / LLM: Prompt Engineering, RAG Pipelines, LLM Evaluation, AI Agent Design, GenAI Tooling (Groq, OpenRouter)

Technical: Python, FastAPI, SQL, React/TypeScript, REST API Design, MySQL/PostgreSQL

Analytics: Product Analytics (DAU/WAU/MAU, retention, funnels), Power BI, SQL, Cohort Analysis

AI PRODUCTS BUILT

LeadFlow AI — *B2B Lead Generation SaaS for US Staffing Firms* [Live Demo](#) | [GitHub](#)

- Solo-built and deployed a full-stack SaaS product from scratch: FastAPI + MySQL backend, multi-API orchestration (Apollo, Prospeo, Resend) for company discovery, contact enrichment, and AI-personalized cold outreach at scale.
- Designed a department-aware role-hierarchy engine and AI email generation pipeline (Groq LLM); shipped real-time analytics dashboard, N8N-based follow-up automation, and a verified custom sending domain for production email deliverability.

OMS Intelligence v2 — *AI-Powered Order Management System* [Live Demo](#) | [GitHub](#)

- Built a full-stack order intelligence platform: FastAPI + PostgreSQL + React/TypeScript, with Groq LLM (Llama 3.3 70B) and FAISS RAG for natural-language querying over order data.
- Integrated Shopify, Twilio (WhatsApp alerts), and N8N workflow automation for SLA breach, stockout, and new-order notifications; deployed live with a custom analytics dashboard.

WORK EXPERIENCE

Lead Generation Executive — [Empower Professionals](#)

Oct 2024 – Mar 2026 · Indore

- Sourced and qualified 100+ candidate/lead profiles using LinkedIn, Apollo, and Scrappr for US-based recruitment roles; maintained structured CSV trackers and CRM records.
- Applied direct domain knowledge of B2B recruitment workflows to inform product logic later used in building LeadFlow AI, including role-hierarchy and targeting design.

Research Participant, AI Coding Behavior Study — [Microsoft Research \(via Upwork\)](#) *Jun 2026 · 1-Month Contract · Remote*

- Completed a structured, 8-ticket Python coding study in a sandboxed VS Code environment, working through bug fixes and feature tickets under a formal research protocol (read → explore → implement → test → commit → submit).
- Contributed data to a Microsoft Research study evaluating developer behavior and productivity patterns with GitHub Copilot-assisted development across randomized participant cohorts.

Data Science & ML Intern — [Zaalima Development](#)

May 2025 – Jul 2025 · Remote

- Built ML models using Pandas, NumPy, and Scikit-learn; performed feature engineering and created publication-quality EDA visualizations using Matplotlib and Seaborn for client datasets.

Data Analytics Intern — [ICT Academy](#)

Feb 2025 – Mar 2025 · Indore

- Built Power BI dashboards for market cap analysis and streaming trend datasets; analyzed large datasets using Excel and SQL with structured visual hierarchy for business storytelling.
